# Memorandum

**Date:** April 2, 2013

**To:** Honorable Chairwoman Rebeca Sosa  
and Members, Board of County Commissioners

**From:** Carlos A. Gimenez  
Mayor

**Subject:** Resolution authorizing the acquisition of designated properties known as Parcel 103-PH2 for Miami-Dade Water and Sewer Department's (WASD) Norris Cut 54-inch Sewer Force Main Replacement Project, to be a Public Necessity

## **RECOMMENDATION**

It is recommended that the Board of County Commissioners (Board) approve the attached resolution declaring the acquisition of Parcel 103-PH2 for Miami-Dade Water and Sewer Department's (WASD) 54-inch Sewer Force Main Replacement Project that extends from Virginia Key to Fisher Island, to be a public necessity and authorize the Mayor or Mayor's designee and the County Attorney to employ appraisers, expert witnesses, obtain required environmental audits, and to take any and all appropriate actions to acquire the subject parcels in fee simple, either by negotiation, donation, purchase at values established by appraisals or tax assessed value whichever is the higher of the two, together with reasonable attorneys' fees and costs pursuant to Chapters 73.091 and 73.092, Florida Statutes, or eminent domain court proceedings including a declaration of taking as necessary for and on behalf of Miami-Dade County.

## **SCOPE OF AGENDA ITEM**

The impact of this project will be Countywide, the parcels to be acquired are located in District 5.

## **FISCAL IMPACT/FUNDING SOURCE**

The fiscal impact to acquire this property has yet to be determined. Funding for this acquisition will be provided from a combination of Wastewater Connection Charges, Wastewater Renewal Funds, and Future WASD Revenue Funds under OMB project # 9650241.

## **TRACK RECORD/MONITOR**

WASD's Deputy Director for Regulatory Compliance and Capital Improvements, Douglas L. Yoder, will oversee the acquisition of this property.

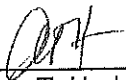

## **BACKGROUND**

A condition assessment performed in 2011 identified several structural deficiencies in the existing 54-inch sewer force main which transmits all sewage collected from Miami Beach, Surfside, Bal Harbour, Bay Harbor Islands, and Fisher Island to the Central District Wastewater Treatment Plant for treatment and disposal. The assessment revealed that the existing 54-inch sewer force main is at high risk of failure and could potentially discharge millions of gallons of untreated sewage into Biscayne Bay. For that reason, WASD is replacing the 54-inch pipeline with a 60-inch sewer force main from upland Miami Beach to Fisher Island and onward to the Central District wastewater Treatment Plant at Virginia Key.

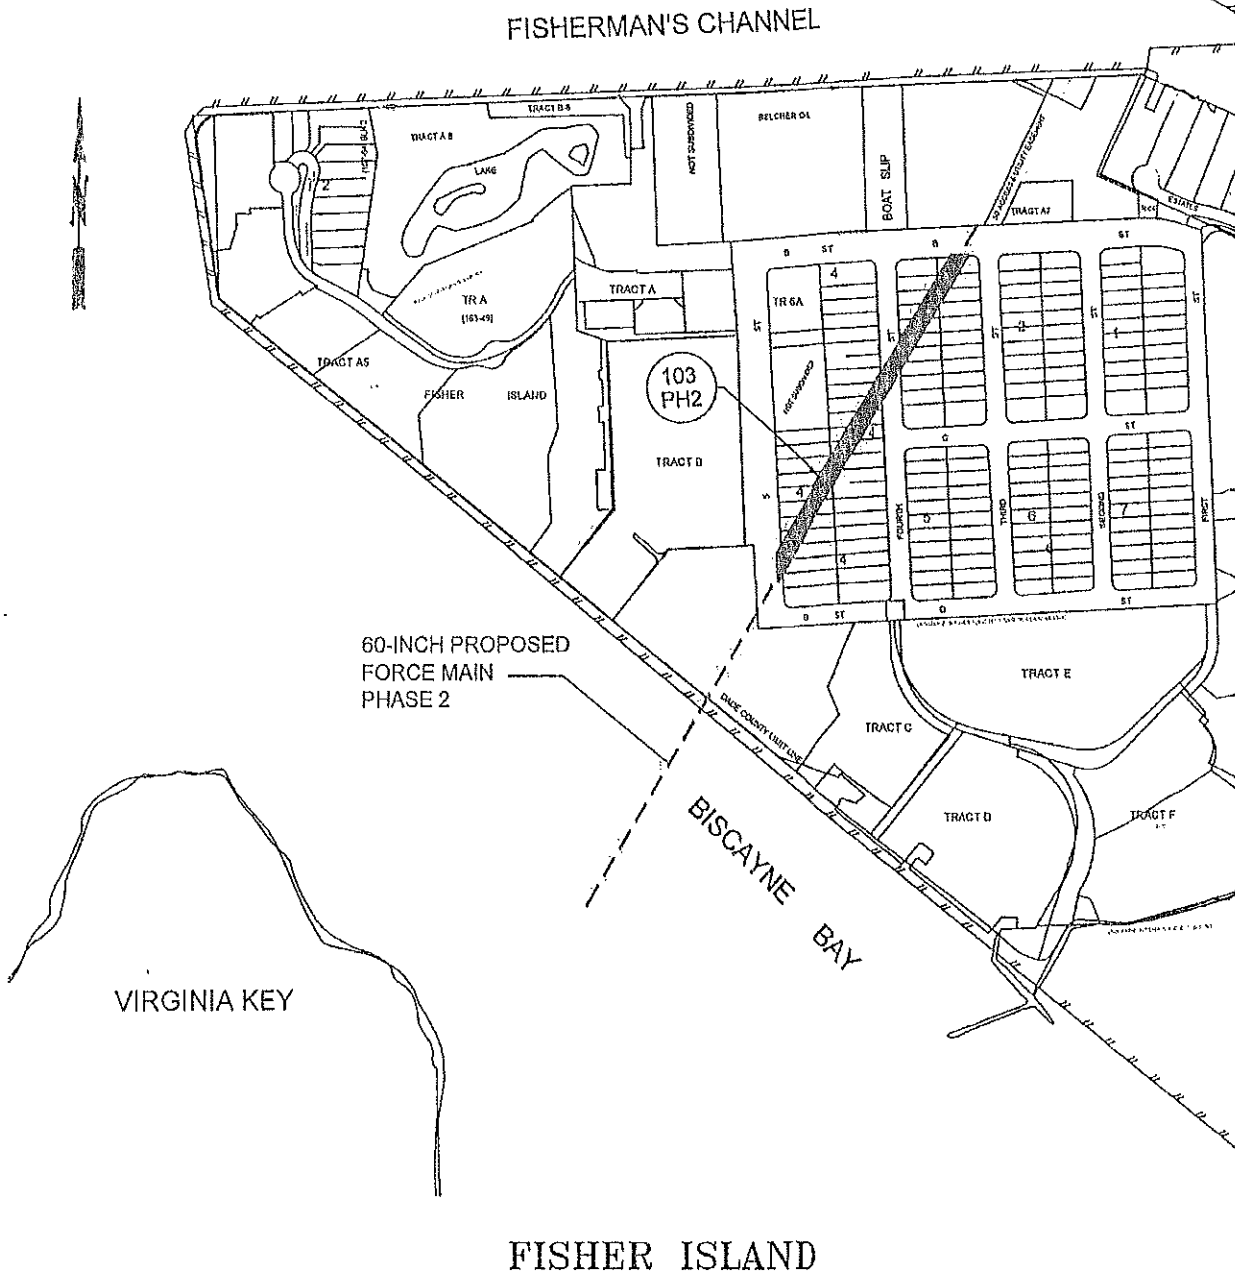

The acquisition of Parcel 103-PH2 shown in Exhibit B (as attached) is needed to acquire a sub-surface easement to install the new 60-inch sewer force main at an elevation between 65 and 70 feet under Fisher Island.

Honorable Chairwoman Rebeca Sosa  
and Members, Board of County Commissioners

The new 60-inch pipeline will provide a minimum 80-year life span and increased capacity conveyance.
